CAREER OBJECTIVE

Seasoned Technical Writer and AI Documentation Specialist with 11+ years of experience seeking a leadership role to design and scale AI-driven documentation strategies, leverage RAG systems and agentic AI for intelligent content delivery, and mentor teams in modern DocOps automation practices.

SUMMARY OF EXPERIENCE

- Proficient in structured writing, Information Mapping, XML tagging, conditional profiling, and single sourcing.
- Experienced in authoring API reference documentation, developer guides, and CLI documentation.
- Experienced with docs-as-code workflows and maintaining documentation in version-controlled environments.
- Experienced in developing content strategies optimized for AI chatbots and end users.
- Skilled in using Python scripts to automate repetitive documentation and content maintenance tasks.
- Experienced in creating software documentation within Agile development environments.
- Proven ability to document complex software and hardware systems into clear, user-friendly technical content.
- Strong collaborator with experience working across geographically distributed and cross-functional teams.
- Mentoring junior writers through knowledge transfer sessions to improve writing quality and productivity.
- Proficient in designing prompt templates, Agentic AI docstrings, RAG architectures; daily Agentic IDE BOB + local model inference for automation workflows.

Key Strengths: Can easily ramp up and understand software and hardware technology.
Domain knowledge: Hybrid Cloud, Data Center, Server, RAG, Agentic AI, IoT Cloud, Virtualization

EDUCATION

- Bachelor of Engineering (**Computer Science**), Dayananda Sagar College of Engineering, Bangalore, 2014.
- Technical Writing certification with The Writers Block (TWB), 2015.

TECHNICAL SKILLS

Authoring guidelines	MSTP and IBM Style Writing Guide
Markup Languages and Programming Languages	Markdown, XML, Python, JSON, YAML, HTML, JavaScript, reStructuredText
Authoring Tools	Arbortext Editor, Oxygen XML, Acrolinx, VS code
Agentic IDE	Antigravity, Codex, BOB, Cursor
AI Frameworks	Langchain, Langraph, Streamlit, Docling, RAG, MCP Server
Local LLM inference	Ollama, vLLM, Unsloth
Graphics and Video Capturing Tool	draw.io, Clipchamp, TechSmith Camtasia
CCMS (DITA)	Astoria, Contenta
CI/CD and Collaboration Tools	Jenkins, GitHub, JIRA, Confluence

PROFESSIONAL EXPERIENCE

IBM Labs R&D

Technical Content Specialist (September 2022 – Present)

Domain: Hybrid Cloud, Data Center Server

- Authoring API, CLI, and developer documentation for IBM Cloud Power Virtual Server.
- Maintaining documentation for IBM Power Server hardware components and troubleshooting guides.
- Collaborating with AI documentation architects to test IBM AI assistant and restructure content for optimized AI and LLM consumption.
- Developed a RAG-based MCP server to bring real-time IBM Style Guide compliance directly into Agentic IDE workflows.
- Collaborating with multiple Product Managers and Engineering teams to align IBM cloud documentation with product roadmap.
- Automated obsolete version documentation using Python scripts and local LLMs, reducing a 3-day manual process to under 4 hours.
- Using local LLM inference techniques to improve content accuracy, consistency, and end-user experience.
- Designing and applying complex DITAVAL-based profiling to manage structured XML content across six IBM Power Server models.
- Performing peer reviews for multiple IBM Cloud documentation sets and mentoring junior technical writers.

Xylem

Lead Technical Writer (June 2020 to September 2022)

Domain: IoT Cloud, IoT Application

- Owned end-to-end IoT documentation for cloud platforms, applications, and gateways.
- Authored docs for 60+ APIs from scratch, enabling faster third-party integrations.
- Collaborated with developers in source code to generate well-written Swagger documentation.
- Range of documentation deliverables includes: API documentation, Developer Guide, Release Notes, UAT Guide.

Unisys

Product Information Specialist (April 2017 to May 2020)

Domain: Cloud computing, Supply Chain Management

- Delivered end-to-end documentation for Data Center application software and Air Cargo software.
- Created DITAVAL files for client-specific webhelp outputs.
- Analyzed user stories and updated the webhelp accordingly.
- Range of documentation deliverables includes: Webhelp, Administration and Operational Guide, Release Notes, and Installation and Implementation Guide.

Kreatio

Technical Writer (January 2015 to March 2017)

Domain: CMS, ERP System

- Created technical documentation for Kreatio CMS and ERP software products.
- Created website wireframes based on Project Manager inputs.
- Created Kreatio Enterprise resource planning video tutorials for clients.

COMMUNITY & LEARNING

- Active participant in corporate hackathons focused on documentation automation and AI-driven workflows.
- Contributor to open-source documentation initiatives, including Hacktoberfest.
- Publishes technical blogs on [Dev.to](https://dev.to) and medium.com, sharing learnings on AI documentation, APIs, and automation.

CERTIFICATIONS

- Complete Agentic AI Bootcamp with LangGraph and LangChain.
- Complete AI Automation and Agentic AI Bootcamp with n8n.
- API Documentation with JSON
- Docker Essentials
- Data Center and Hybrid Cloud Essentials
