

SIDDHARTHA MANI

TECHNICAL CONTENT PROFESSIONAL @ IBM LABS

Overall Experience: 11+ years

Mobile: +91 9148257837

Email: mani.siddhartha@gmail.com

CAREER OBJECTIVE

Seasoned Technical Writer and AI Documentation Specialist with 11+ years of experience seeking a leadership role to design and scale AI-driven documentation strategies, leverage RAG systems and agentic AI for intelligent content delivery, and mentor teams in modern DocOps automation practices.

SUMMARY OF EXPERIENCE

- Proficient in structured writing, Information Mapping, XML tagging, conditional profiling, and single sourcing.
- Experienced in authoring API reference documentation, developer guides, and CLI documentation.
- Experienced with docs-as-code workflows and maintaining documentation in version-controlled environments.
- Experienced in developing content strategies optimized for AI chatbots and end users.
- Authored Python scripts and Streamlit sample applications for documentation automation, including RAG system prototyping and LLM-based content optimization tools.
- Experienced in creating software documentation within Agile development environments.
- Proven ability to create clear, user-friendly documentation for complex software and hardware systems.
- Strong collaborator with experience working across geographically distributed and cross-functional teams.
- Mentors junior writers through knowledge transfer sessions to improve writing quality and productivity.
- Proficient in designing prompt templates, Agentic AI docstrings, and RAG architectures to support intelligent automation workflows.

Key Strengths: Can easily ramp up and understand software and hardware technology.

Domain knowledge: Hybrid Cloud, Data Center, Server, RAG, Agentic AI, IoT Cloud, Virtualization.

KEY ACHIEVEMENTS

- Built Python + Ollama solution for automated identification and removal of version-specific DITA content, reducing manual archival process from 3 days to 4 hours.
- AI-Powered Documentation Review System: Designed and deployed Streamlit + Python + Ollama + Doclings RAG system for intelligent style guide enforcement and peer-review automation, reducing peer-review time by 40%.
- Multi-Variant Documentation Management: Managed documentation across 6 IBM Power Server models using DITAVAL profiling, reducing content duplication by 65%.

TECHNICAL SKILLS

Authoring guidelines	MSTP and IBM Style Writing Guide
Markup Languages and Programming Languages	Markdown, XML, Python, JSON, YAML, HTML, JavaScript, reStructuredText
Authoring Tools	Arbortext Editor, Oxygen XML, Acrolinx, VS code
Video Capturing Tool	Clipchamp, TechSmith Camtasia
AI Frameworks	LangChain, LangGraph, Streamlit, Docling, RAG, MCP
Local LLM inference	Ollama
Graphics Tool	draw.io
CCMS (DITA)	Astoria, Contenta
CI/CD and Collaboration Tools	Jenkins, GitHub, JIRA, Confluence

PROFESSIONAL EXPERIENCE

IBM Labs R&D

Technical Content Professional (September 2022 – Present)

Domain: Hybrid Cloud, Data Center Server

- Authoring API, CLI, and developer documentation for IBM Cloud Power Virtual Server.
- Maintaining documentation for IBM Power Server hardware components and troubleshooting guides.
- Collaborating with AI documentation architects to test AI chatbots and restructure content for optimized AI and LLM consumption.
- Collaborating with multiple Product Managers and Engineering teams to align IBM cloud documentation with product roadmap.
- Automated obsolete version documentation using Python scripts and local LLMs, reducing a 3-day manual process to under 4 hours.
- Using local LLM inference techniques to improve content accuracy, consistency, and end-user experience.
- Designing and applying complex DITAVAL-based profiling to manage structured XML content across six IBM Power Server models.
- Performing peer reviews for multiple IBM Cloud documentation sets and mentoring junior technical writers.
- Exploring low-code and AI automation tools such as Langflow and n8n to scale DocOps workflows and documentation automation.
- Participating in hackathons, Hacktoberfest, and AI-driven documentation initiatives.

Xylem India R&D

Lead Technical Writer (June 2020 to September 2022)

Domain: IoT Cloud, IoT Application

- Owned end-to-end IoT documentation for cloud platforms, applications, and gateways.
- Worked in a two-week agile environment.
- Provided documentation demo to stakeholders after each sprint completion.
- Collaborated with developers in source code to generate well-written Swagger documentation.
- Range of documentation deliverables includes: API documentation, Developer Guide, Release Notes, UAT Guide.

Unisys India R&D

Product Information Specialist (April 2017 to May 2020)

Domain: Cloud Computing, Supply Chain Management

- Delivered end-to-end documentation for Data Center application software and Air Cargo software.
- Created DITAVAL files for client-specific webhelp outputs.
- Analyzed user stories and updated the webhelp accordingly.
- Range of documentation deliverables includes: Webhelp, Administration and Operational Guide, Release Notes, and Installation and Implementation Guide.

Kreatio

Technical Writer (January 2015 to March 2017)

Domain: CMS, ERP System

- Authored technical documentation for Kreatio CMS and ERP software products.
- Designed website wireframes based on Project Manager inputs.
- Produced Kreatio Enterprise resource planning video tutorials for clients.

COMMUNITY & LEARNING

- Actively participated in corporate hackathons focused on documentation automation and AI-driven workflows.
- Contributed to open-source documentation initiatives, including Hacktoberfest.
- Published technical blogs on Dev.to and medium.com, sharing learnings on AI documentation, APIs, and automation.

EDUCATION & CERTIFICATIONS

- Bachelor of Engineering (**Computer Science**), Dayananda Sagar College of Engineering, Bangalore, 2014.
- Technical Writing certification with The Writers Block (TWB), 2015.
- Complete Agentic AI Bootcamp with LangGraph and LangChain, 2025.
- Docker Essentials.
- Data Center and Hybrid Cloud Essentials.
